The main goals of the ASRS DEI Ad-Hoc Committee are to increase the representation and amplify the voices of Underrepresented in Medicine (URiMs) within the field of retina. To that end, the committee runs a mentorship program for URiMs, creates educational materials for the ASRS membership to educate on issues related to diversity, equity, and inclusion, and carries out multisite research dealing with health equity.

DEI Ad-Hoc Committee Co-Chairpersons: Basil K. Williams, MD and Vivienne S. Hau, MD, PhD
