

**John Gonzales, MD**

Dr. Gonzales is an associated professor of ophthalmology at the Francis I. Proctor Foundation at the University of California, San Francisco specializing in uveitis and medical cornea. He is supported by an early career award from the National Institutes of Health – National Eye Institute to study the spectrum of keratoconjunctivitis sicca in Sjögren’s syndrome utilizing the Sjögren’s International Collaborative Clinical Alliance (SICCA) cohort. Dr. Gonzales is also pursuing treatment strategies in cytomegalovirus anterior uveitis in immunocompetent individuals. Dr. Gonzales’s interests also extend to ocular oncology, specifically primary vitreoretinal lymphoma, and he is interested in how clinical features may be correlated with mutations associated with lymphoproliferation as well as resistance to chemotherapeutics.

Dr. Gonzales is a Section Editor for Current Opinion in Ophthalmology and is the uveitis fellowship program director at the Proctor Foundation.
