Daniel Maher

Daniel Maher is Vice President of Managed Care for EyeCare Partners. With 15+ years of healthcare leadership experience, including a decade dedicated specifically to ophthalmology and retina, Daniel brings a rare combination of clinical-workflow fluency, RCM depth, and high-stakes contracting expertise to every negotiation. He is known for translating complex data into actionable strategy, whether surfacing seven-figure underpayment patterns or building the analytical case that shifts a payer's position at the table. His career spans academic medicine, where he managed professional fee revenue across seven departments at the University of Colorado Hospital, through practice-level RCM leadership, and into national managed care as the retina space consolidated around him.

When he's not restructuring payer relationships, Daniel is an accomplished musician with deep roots in the New York City indie-rock music scene. He now lives in Denver with his husband and three dogs.
